

NANO Security Ltd.

**An unique antivirus solution
for your business**

What is the NANO Antivirus White Label platform?

YOUR LOGO
YOUR COLORS
YOUR IDEAS

NANO Antivirus White Label is a white label platform for anybody who wants to have their own branded antivirus solution. Do you want your own antivirus with your name, logo, localization, functionality? Just imagine how much time do you need to develop your own antivirus from scratch. Besides, you will need financial resources, expensive infrastructure, and highly skilled team.

We can do it for you!

NANO Antivirus White Label saves you money, efforts, and time! We will do it instead of you. You just describe to us your requirements and get your own antivirus in the shortest time. You don't need to be an IT-person to get your own antimalware solution. So you can start your own antivirus business quickly and smoothly.

You care only about your business and we care about all technical issues!

Who are our partners?*

The IT company “A” has its own software portfolio and channels of promotion. It wants to enhance the portfolio with an antivirus under own brand.

The non-IT company “B” has a lot of clients all over the world and as a part of its marketing program decided to increase client loyalty presenting them free antivirus under own brand.

The company “C” does business in the country that does not have a local antivirus producer. The company supplies for the government and decided to also supply an antivirus solution under own brand and in the local language.

The IT company “D” provides the customers with outsourcing technical support and has a package of utilities and channels of communication with the clients. To stimulate the business, the company decided also to offer them its own antivirus.

An individual entrepreneur has an idea how to promote and sell an antivirus solution using a unique license system which has a huge business potential on the local market.

*Based on the real cases of customers

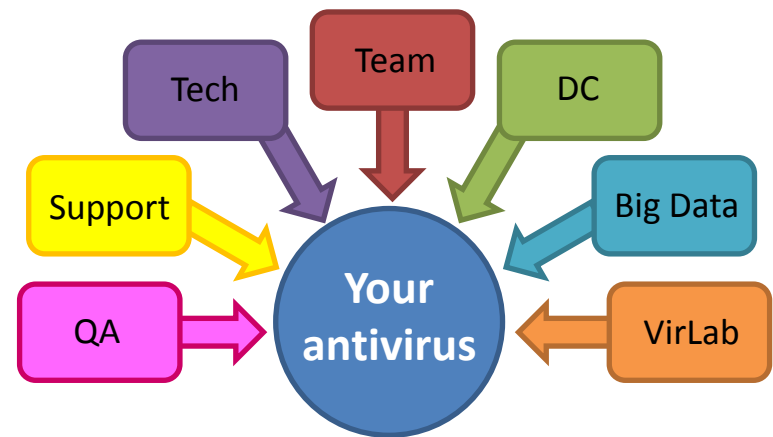

Antivirus solutions in the world

Do you know how many countries have their own antivirus? Only few, just about 25* worldwide! However, each country strives to provide the national cybersecurity using its own antivirus. And moreover, this is a great idea for any country to have the local antivirus in its own language. How to create a local antivirus fast and smooth if there isn't any first-level antivirus producer? Easy!

The countries that have their own antivirus solution*

Our company is one of the first-level producers. We hold our own patented antivirus technologies and all infrastructure to create new antivirus solutions such as ready-to-use solutions, a professional development team and our own virus laboratory, own sources of topical malware samples for 24x7 replenishment of the virus base, QA, tech support, own data-center and more. So we know how to do all our best to provide you with a quality product.

*According to AV-Comparatives data: <http://www.av-comparatives.org/av-vendors/>

Quality

Payment model

STEP ONE

You pay the initial payment for the development of the new solution according to your requirements and get your own antivirus.

The payment starts from \$8000

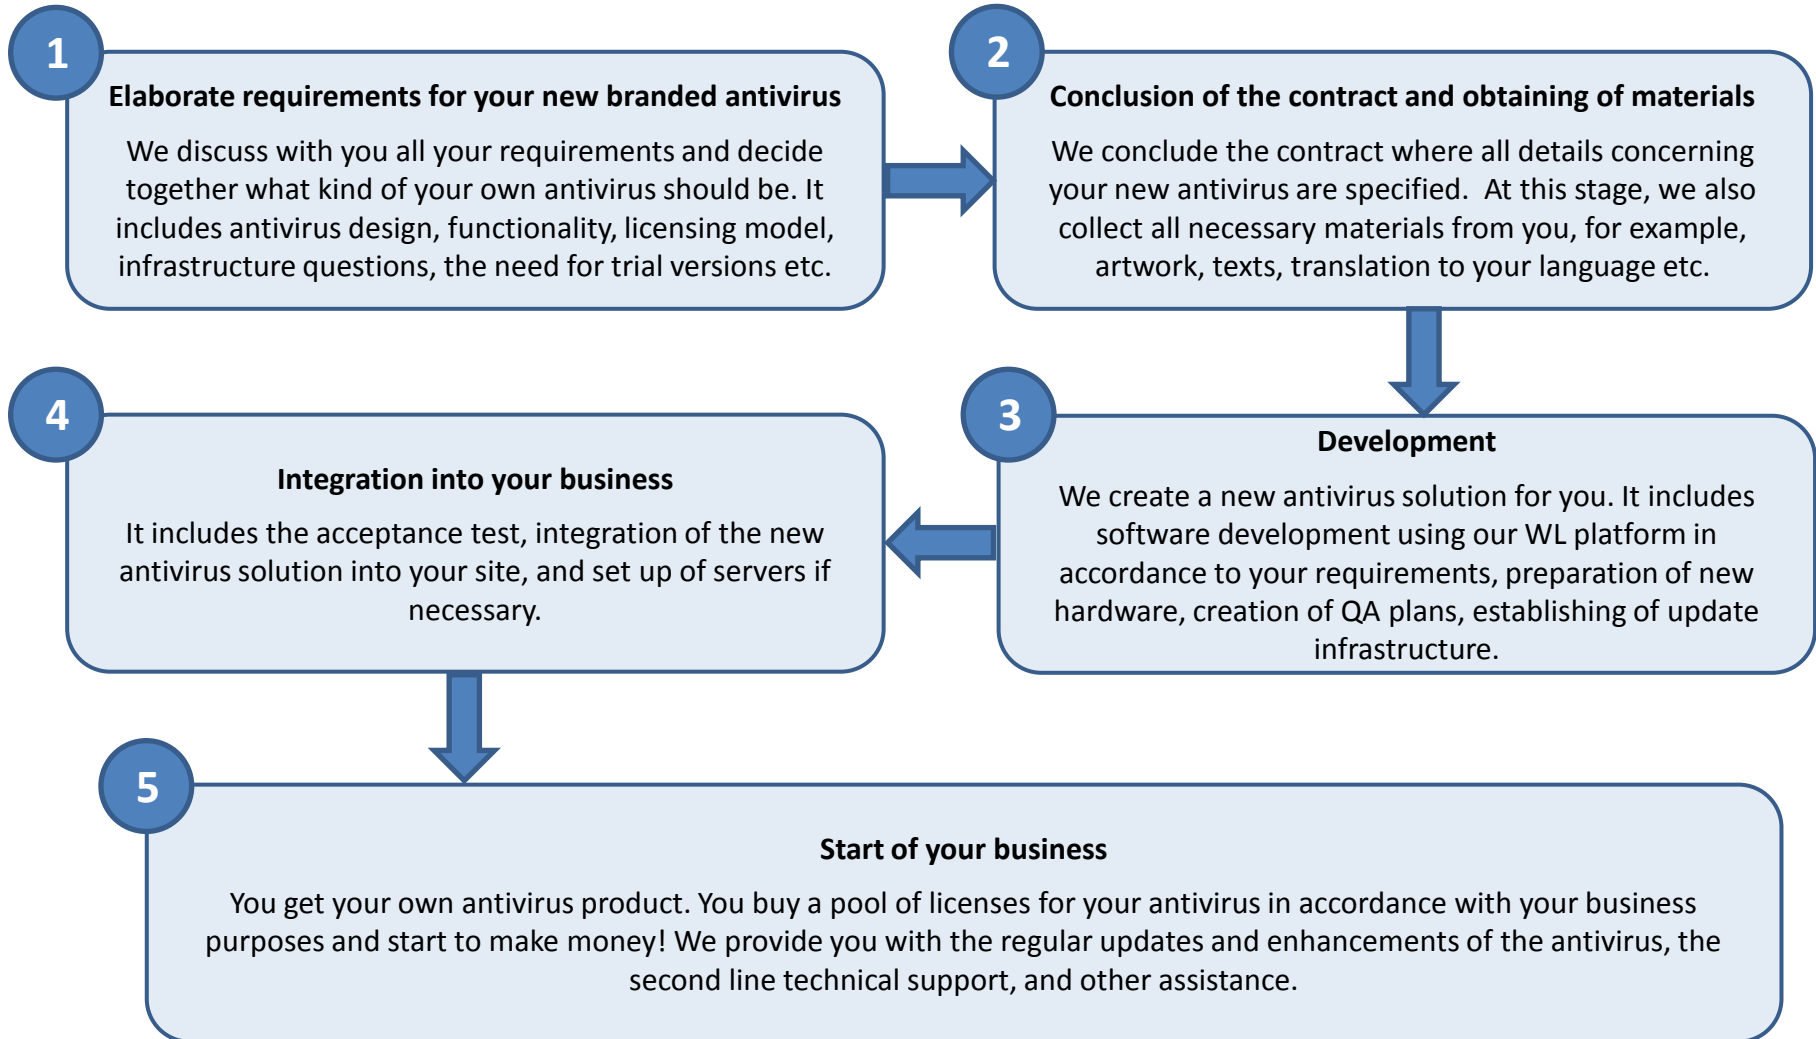

STEP TWO

You pay for licenses and then start the business selling your antivirus!
You can buy as many licenses and as often as you need.

The price for one license can start from \$1

How to start?

Technical support

You provide customers with a first-line technical and sales support in your language

You are responsible only for your business issues, such as product price, methods of payments, installation, supported operation systems, hardware requirement, functionality, settings of the product, updates, interaction with other products, and other common technical matters.

We provide you with a second-line priority support for all technical issues

We are responsible for all complicated technical matters for that you don't have ready answers for. We provide software updates for fast response to new malware, perform license control, analyze users' telemetry and solve other technical problems.

Flexible pricing policy

- We provide the licenses by pools. The greater the pool, the lower the price per one license. The discount can reach 50%.
- We provide with an additional discount for one large sales volume.
- If you buy the license pool at the stage of the development, we provide a discount for the initial payment.
- We offer a free start-up pool of licenses as a bonus to you.
